

# UNINTERRUPTED POWER SUPPLY

## STANLEY UPS FOR AUTOMATIC SLIDING DOORS

### UNINTERRUPTED EMERGENCY BACKUP POWER SUPPLY FOR AUTOMATIC DOORS

Uninterrupted Power Supply (UPS) provides an unmatched level of emergency egress in retail, health care & commercial environments. The STANLEY UPS provides continued operation of automatic doors for up to 1.5 hours in the event of power outages or main power failure. Rest easy knowing that this UPS allows easy access for pedestrians in emergency situations and reduces potential door package damage.

The STANLEY UPS unit has a Low battery feature that enables safe and secure shutdowns. The compact design allows for total concealment within the header, and is natively compatible with Dura-Glide® / Dura-Guard® / Dura-Storm® 2000/3000 Series and Bypass door packages.
